EXPLANATION:

Team percentages are derived by dividing a team's actual voting points by a maximum 1625 possible points in the AP Poll and 1525 possible points in the USA Today/ESPN Coaches Poll.

Six computer rankings calculated in inverse points order (25 for #1, 24 for #2, etc.) are used to determine the overall computer component. The best and worst ranking for each team is dropped, and the remaining four are added and divided by 100 (the maximum possible points) to produce a Computer Rankings Percentage. The six computer ranking providers are Anderson & Hester, Richard Billingsley, Colley Matrix, Kenneth Massey, Jeff Sagarin, and Peter Wolfe. Each computer ranking accounts for schedule strength in its formula.

The BCS Average is calculated by averaging the percent totals of the Associated Press, USA Today/ESPN Coaches and Computer polls.

On January 4, 2005, the FedEx Orange Bowl will host the BCS National Championship Game and determine which team will be presented The National Football Foundation and College Hall of Fame's MacArthur Trophy, awarded to college football's National Champion since 1959, as well as the ADT National Championship Trophy on behalf of the American Football Coaches Association.
